## Conference Preview 2010

The 2008 Water Loss Conference was held at the Trusts Stadium attracted 80 attendees and included a static trade display. Around half the attendees were from the water suppliers with the balance made up of consultants, product sales and contractors.

This bi-annual event is the best opportunity to network, learn and focus on issues from a water loss perspective.

The 2010 Conference Programme features both local and international speakers whose expertise covers a broad range of backgrounds.

Presentations will include a balance of technical expertise, research, project and product information and theory.

At the conclusion of Day One, the GHD Conference Dinner will be held (at the Trusts Stadium).

### Delegates

Successful networking is a regular feature of Water New Zealand conferences. We encourage delegates to bring educational material, brochures, guides, and or handbooks that they believe may be useful to share with other conference attendees.

### Exhibition

A static exhibition featuring the latest products and services will be set up for the duration of the conference.

## Water Loss Manual

The Conference will launch the updated New Zealand Water Loss Manual.

## Overseas Speakers

Conference Management is excited to announce that the following industry professionals will be presenting at the Conference.

- Dr Ronnie McKenzie, Director, Water Resource and Planning Conservation, South Africa
- Edgar Johnson, Service Line Leader, Water Efficiency, GHD Australia
- Tim Waldron, CEO, Wide Bay Water Corporation, Queensland
- Pankaj Mistry, Manager, Water Demand Management, Wide Bay Water Corporation, Queensland

## Presentations will include:

- New Water Loss Guidelines
- Selection of Zones and Sectorising
- Managing water loss in New Zealand
- Meter accuracy, quality assurance and calibration
- Australian Water Loss Update
- Establishing District metered areas and pressure management zones
- Minimisation of errors in the data acquisition cycle
- Overview of pressure management
- Water Loss Strategy
- Latest technology in leak detection practices
- Implementing Demand Management

There will also be several case studies presented, as well as a Q&A session, along with an open forum on Sectorising distribution networks.
