

BUILDING A BETTER WORLD

LEAD MWH'S DESIGN ACROSS ASIA PACIFIC

We take design seriously. Do you?

As infrastructure and environment experts, MWH provides support and advice to infrastructure owners in the planning, design, development and management of their transport, water, wastewater, energy, building and industrial assets and systems. We're also widely recognised for our expertise in planning, environmental science, sustainable development, risk management and management consulting.

AP DESIGN is an exciting new initiative across the MWH Asia Pacific region which aims to enhance our design capability and promote technical excellence. Through AP DESIGN we will establish a higher standard of delivery, promote greater opportunities for our technical people and develop industry-leading technical solutions.

We are looking for a team of talented and dedicated **DISCIPLINE LEADERS and CHIEF ENGINEERS** to lead our design business. These people will be an integral part of AP DESIGN and will provide regional leadership and solutions to help drive our design capability to the next level.

Discipline Leaders will be responsible for developing MWH's design capability and fostering a culture of technical excellence through training, tools, knowledge reuse and delivery. Chief Engineers will set the standard for our design and ensure high quality design outcomes for clients.

If you are an experienced specialist in the areas of Design Management, Civil-Water, Civil - Transportation, Structural, Geotechnical, Mechanical, Electrical, Process Engineering or CAD with the skills and motivation to lead and shape design across the Asia Pacific Region we are interested in hearing from you.

These roles can be based in major centres in either Australia or New Zealand.

To apply, please go to www.mwhglobal.co.nz/careers For more information contact Megan Davey on megan.davey@mwhglobal.com

Applications close Sunday 7 February 2010.
