

Environmental Compliance Team Leader

Applications close Tuesday, 1st July 2010.

Be part of the team minimising the environmental affects on our vibrant city.

As our Environmental Compliance Team Leader, you'll play a key leadership role to guide a small dynamic team, dedicated in ensuring the City Waters Units compliance requirements are met and minimal asset and environmental impact is achieved.

Using your knowledge in environmental resources consent management and waters and solid waste processes along with your experience in administering and managing a variety of systems and databases, will ensure accurate information on tradewaste is provided to the organisation and our diverse range of customers.

Relentless in your commitment to go the extra mile and find effective solutions for our customers, your exceptional communication skills will allow you to liaise confidently with both internal and external stakeholders. An ability to think on your feet to provide responses in emergency management events will be essential.

Your relevant engineering or science qualification, along with experience within the environmental industry and managing large wastewater discharge consents will be integral to your success.

Sound like you? Apply today.
