

BUILDING A BETTER WORLD

National Technical Lead - Network Planning

The successful candidate will need to have extensive experience relating to water and/or wastewater network planning and hydraulic modelling together with strong business development and client management skills, and will be generally recognised as an industry leader.

- Water and/or Wastewater Hydraulic Modelling
- Business Development & Client Management
- Flexible on location
- Shape the future of our hydraulic modelling business

As infrastructure and environment experts, MWH provides support and advice to infrastructure owners in the planning, design, development and management of their transport, water, wastewater, energy, building and industrial assets and systems. We're also widely recognised for our expertise in planning, environmental science, sustainable development, risk management and management consulting.

Our services include a full range of water related projects in infrastructure engineering ranging from supply, treatment, storage and management of the three waters. We're looking for an experienced Network Planner to lead water and/or wastewater projects. You'll have the opportunity to be involved in a wide range of projects ranging from water distribution network projects, collection system projects, pipelines, surge analysis, feasibility studies, outline and detailed designs development of risk based support tools

You'll be actively involved in developing our water business, assisting with and leading bid preparation, presentations to prospective clients and providing technical advice for projects. Alongside this you'll mentor junior staff, check technical content and review projects ensuring they're completed to quality, time and budget.

This is a fantastic opportunity for an industry leader to influence the development of our national modelling team. You'll be degree qualified and be proficient with a variety of modelling software such as InfoWorks, MIKE Urban and H2OMap packages. We are flexible on location for this role. If you are interested in this position, please tell us more about your skills and experience by applying online here. Please specify your preferred location in your cover letter.

Our people are our strength. To attract and retain the best people we offer competitive remuneration packages, which include health and income continuance insurance, a competitive salary and training.
