NATIONAL LIFELINE UTILITIES FORUM

Monday 15th October Tuesday 16th October 2018 Te Papa | Wellington

Registrations are required by the 20th September by email to lisa@infradecisions.co.nz

Overview

The annual National Lifeline Utilities forum brings together key participants in New Zealand's lifelines utilities, namely practitioners in infrastructure resilience planning, to discuss the latest developments. The forum is free for invited participants from regional Lifelines Groups, national lifeline utilities, critical customers, research agencies and others improving New Zealand's infrastructure resilience.

Key information

key information	
Cost:	No registration fee for invited participants.
	Funding is by New Zealand Lifelines Council member organisations with additional sponsorship by EQC.

Feature sessions

- Supply chain resilience understanding your weakest link.
- New Zealand Transport Agency -Strengthening NZ's Highway Systems.
- Engineering a better (and more resilient) New Zealand – an initiative by Engineering NZ across water supply, climate change and seismic resilience.
- Volcanic eruptions in the Pacific, large NZ storm events, major infrastructure outages – what have we learnt this year?
- Implications of the Emergency Management Review ('Better Government Responses)' for Lifelines.
- Importance of situational awareness in an emergency – ways of sharing information before, during and after the event.
- Latest research into infrastructure impacts from hazards how can I use it?

Post Forum Workshops

Two workshops are being hosted on the 17th October in Wellington:

- Using spatial tools for resilience and emergency management – why and what's possible? Run by NZGIS4EM (NZ GIS for Emergency Management). Further details to follow.
- Infrastructure Research Integrating research into practice. Register your interest with roger.fairclough@neoleafglobal.co.nz.

The contribution by NZLC members and additional financial support by EQC for the National Lifeline Utilities Forum is gratefully acknowledged
