

Climate Change Group
WATER NEW ZEALAND

Dr Rowan Dixon

Rowan is WSP lead for sustainability advisory services and manages the sustainability and social outcomes programs for some of Aotearoa New Zealand's most complicated built environment projects. This includes ambitious carbon emission reductions, social outcomes, training and supply chain development, improving environmental value of water, zero waste to landfill and best practice climate risk assessment and treatment. Rowan will speak on the imperative for action and what practical steps can be taken to scale up mitigation of emissions.
