

Brendon Harkness:

Brendon Harkness currently works as lead water network planner at Watercare, but has been involved in a range of community development projects across APAC and Africa - involving research, stakeholder liaison, technical and performance reviews, design, and capacity building for government, NGOs and donors.

During 2016, his M.Phil research developed a holistic assessment framework covering the technical, economic, environmental and social costs and benefits of solar water pumping in refugee contexts for UNHCR. Brendon has completed Water projects in NZ, Thailand and Samoa, as well as sustainability assessments for water systems in refugee camps in Tanzania, Sudan, and Bangladesh.
